SCHOOL OF COMPUTER SCIENCE AND ARTIFICIAL INTELLIGENCE		DEPARTMENT OF COMPUTER SCIENCE ENGINEERING	
Program Name: B. Tech		**Assignment Type:** Lab	**Academic Year:** 2025-26
Course Coordinator Name	Dr. Jagjit Singh Dhatterwal		
Instructor(s) Name	Dr. Jagjit Singh Dhatterwal		
Course Code	23CS201PE401	**Course Title**	Blockchain Engineering
Year/Sem	III/II	**Regulation**	R25
Date and Day of Assignment	09-02-2026	**Time(s)**	9:00AM to 11:00AM
Duration	2 Hours	**Applicable to Batches**	(23CSBTB19, 23CSBTB20 23CSBTB21, 23CSBTB22 23CSBTB23, 23CSBTB24 23CSBTB25, 23CSBTB26)
Assignment Number: 03/12			

Q. No.	Question	Expected Time to complete
1	**Smart Contract Development and Unit Testing using Hardhat** **Objective** To implement a simple Ethereum smart contract and perform **unit testing** using **Hardhat** and **Mocha/Chai**, ensuring correct functionality through automated tests. **Problem Statement** Develop a basic **Personal Portfolio Smart Contract** that stores and retrieves portfolio details (name, role, and description). Write unit tests to validate the contract functions using **Hardhat**. **Requirements** • Add inline comments explaining the logic • Run tests and record outputs • Take screenshot of VS Code while running tests **Software & Tools Required** • VS Code	

Code:

```python
import tkinter as tk
from tkinter import messagebox, scrolledtext
import time
